

# AI-Powered HR Bot

## React to employee questions instantly

Leave routine employee requests to our Digital Agent who is **available 24x7 via any communication channel** of your choice (voice, chat, email, social media or other messaging platforms). It significantly **reduces response time**, so your employees aren't left waiting and it allows HR teams to focus on more important queries. With our AI-driven platform, you can **automate up to 43% of employee interactions**.

 **43%**

of conversations can be fully automated

 **24x7**

availability

 **51%**

decrease in human effort

## Automate your HR workflows

Our Digital Agent makes your **onboarding process smoother** and can transform it into a self-service process. With our Digital Agent, companies can automate processes such as **document submissions, training plans and regular check-ups**.

With our Digital Agent, employees can also:

- Check leave balances
- Check salary information
- Apply for a leave
- Report an issue/provide feedback, etc.

**DIGITAL AGENT**

You have 12 vacation days left.

Welcome to the team! Here is your onboarding schedule for next week:

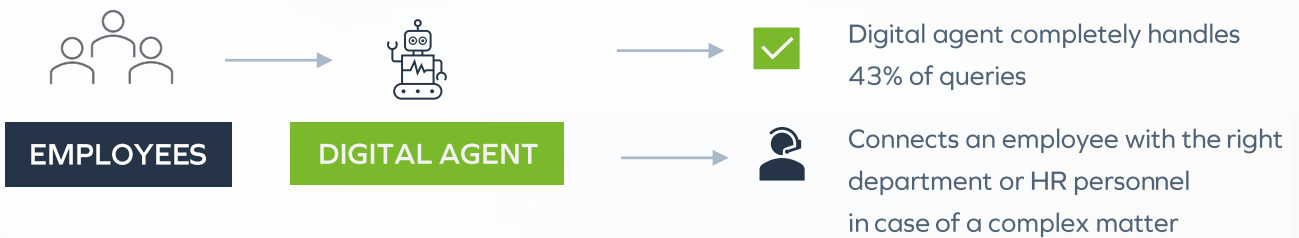

Please upload your tax declaration documents here:

## Digital Agent

- **Authenticates customers** by name, customer ID, voice biometry, policy number, social security number, or any other identifying information.
- **Handles the interaction automatically** without the participation of a human agent. For example, it receives customer claims, provides information about payments and status of claims, etc.
- **It immediately connects the customer with a human operator** if the predictive model indicates a more complex request.
- **Sends automatic notifications:** it informs employees about important events or activities
